EDUCATION

K.J.Somaiya Institute of Technology, Mumbai

B.Tech in Electronics and Telecommunication and Honours in Data Science

CGPA: 9.47/10

Nov 2022 – May 2025

Trimurti Polytechnic

Diploma in Computer Engineering

Percentage: 80%

Dec 2020 – May 2022

CAREER OBJECTIVE

- Passionate Web and Software Developer with hands-on expertise in React.js, PHP, WordPress, SQL, and modern front-end frameworks, eager to apply full-stack development skills to build user-friendly and scalable web applications.
- Experienced in integrating APIs, optimizing performance, and developing innovative web solutions, with a strong foundation in Python, AI/ML, and data-driven problem solving for future-ready applications.

WORK EXPERIENCE

Web Development Intern

Jan 2022 – April 2022

Tantrasoft Solutions, Mumbai

- Assisted in developing and customizing client web applications using front-end technologies, including fixing bugs and implementing new UI features. Optimized database queries and improved front-end performance, reducing load times by 25%.

Full Stack Developer Intern

Mar 2024 – Aug 2024

Quixta, WFH

- Built 5 client-style WordPress websites with PHP & MySQL back-end and ReactJS front-end, delivering responsive, SEO-optimized designs and improving load performance by 40%.

Full Stack Developer

Jun 2024 – Sep 2024

IoT Cell, KJSIT, Mumbai

- Built an event management platform with online registration & Razorpay payment integration, digitizing 100% of fest entries and reducing manual work.

Machine Learning Intern

Nov 2023 – Jan 2024

Kids Galaxy, Mumbai

- Developed an AI based chatbot to assist and guide students and help them to solve queries using chat services.

TECHNICAL SKILLS

Languages – Python, SQL, C++

Web Development – HTML5, CSS3, JavaScript, ReactJS, PHP, WordPress

Analytical – Machine Learning, Deep Learning (Neural Networks, CNN, LSTM), NLP, Statistical Modelling

Frameworks & Libraries – NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, Matplotlib, Seaborn, Django, Flask

Databases – MongoDB, MySQL

Tools – Git, Linux

PROJECTS

SmartSite Studio – All in One Website Management SaaS (React, Node.js, TypeScript, MySQL)

- Built a unified dashboard for WordPress, Shopify, and Webflow, onboarding sites in under 5 minutes, automating 20+ performance and security checks, improving Lighthouse scores by 20–40% and reducing manual operations by ~60%.
- Developed TypeScript Express API with 15+ endpoints and JWT auth, MySQL database for users/sites, and a React UI with 10+ analytics visualizations; enabled one-click backups/migrations (<60s) and A/B tests that increased CTR by 8–15%.

AI Content Optimizer – WordPress SEO & Readability Assistant (React, TypeScript, REST, Tailwind, Vite)

- Built a modular WordPress plugin using PHP, React, TypeScript, Vite, and Tailwind, adding a unified editor sidebar with AI suggestions and 20+ SEO/readability checks, reducing manual editing time by 30–50%.
- Implemented secure REST endpoints, batch optimization, caching, and exportable reports, and delivered a responsive React SPA for settings and analytics with a CI build pipeline, cutting repeat analyses by ~40%.

YouTube Transcript Summarizer – Flask TextRank NLP App (HTML, CSS, JavaScript, Python, Flask)

- Built a Flask app that fetches YouTube transcripts and generates TLDRs with TextRank; delivers adjustable summaries in seconds, reducing time-to-insight by ~80–90% on typical 10–20 minute videos.
- Packaged for fast local setup (4 commands) and one-command run on port 5000; added robust error handling for videos without transcripts and a clean HTML, CSS, and JavaScript UI.

Crowdfunding & Event Management Platform (ReactJS, Django, MySQL)

- Designed a web platform for technical fest registrations and payments, enabling students to browse events, register, and pay securely online through Razorpay.
- Built an admin dashboard for committee to manage participants, approve campaigns, and track funds with real-time progress and fraud prevention.

CERTIFICATES

Data Base Management System: NPTEL (2023)

Linux OS: Spoken Tutorial (2024)

Python: Spoken Tutorial (2023)

Data Analytics and Visualization: Accenture (Forage-2024)

CO-CURRICULAR ACTIVITIES

- **CEO (IoT Cell):** Organized IoT events, workshops, and hackathons while managing team coordination and event execution.
